- Angular
- NodeJS
- Typescript
- ExpressJS
- SQL
- Git
- TailwindCSS
- React Native
- HTML5 / CSS3
- English B2
- Adaptability
- Communicative
- Proactive
- Collaborative
- Problem-solver

## EXPERIENCIA LABORAL

### Mid Frontend Developer – WebTech Solutions

January 2024 – Present | Direct Supervisor: Diego Guilombo (ferchod2010@gmail.com)

Working remotely on a project for an international client, responsible for the complete development of the frontend using **Next.js, React, and TypeScript**. Designed the interface from scratch, focusing on an intuitive and functional user experience. Translate client requirements into an efficient application, make key technical decisions, apply best practices, and optimize performance to deliver a high-quality final product.

### Frontend Developer Intern – Pragma

September 2024 – March 2025 | Direct Supervisor: Diego Orozco (diego.orozco@pragma.co)

Improved and optimized internal applications using primarily **React, Angular, JavaScript, and TypeScript**, focusing on new features, bug fixing, and performance. Worked with agile methodologies such as **Scrum and Kanban**, collaborating with different teams and contributing to the continuous improvement of processes to deliver stable solutions aligned with business goals.

### Frontend Developer – Contractor

July 2023 – August 2024 | Direct Supervisor: Juan Sebastián Galvis (sebastian.galvis@groupm.com)

My first professional experience was as a contractor working on the development of a sports betting web application, created as part of a client initiative. I participated in the frontend development, implementing features such as user registration, sports event management, real-time betting, and statistics visualization. This project allowed me to apply my knowledge of **React and TypeScript** in a real-world setting, gain hands-on team experience, and better understand the full lifecycle of web application development.
